M.Sc.

NETWORKING & INFORMATION

TECHNOLOGY

SYLLABUS

TAMILNADU STATE COUNCIL FOR HIGHER

EDUCATION, CHENNAI – 600 005

THOSE WHO JOINED FROM THE ACADEMIC

YEAR

2024 - 2025

MANONMANIAM SUNDARANAR UNIVERSITY, TIRUNELVELI
PG PROGRAMME – AFFILIATED COLLEGES
M.Sc. NETWORKING & INFORMATION TECHNOLOGY
(Choice Based Credit System)
(with effect from the academic year 2024-2025)

PREAMBLE

The Learning Outcome-based Curriculum Framework (LOCF) approach has been adopted in M.Sc. Networking & Information Technology Programme to create and disseminate knowledge to the students on the latest technologies by imparting the technical skills to meet industrial needs and inculcate the skills for employability at the point of post graduation.

Vision

Empowering students with computing knowledge to stay in forefront of state-of-art technologies for rendering the need based services to the society.

Mission

- To impart quality based education by inculcating technical, entrepreneurship and leadership skills to meet global challenges.
- To enable the students acquire the skill of employability and entrepreneurship.

Programme Educational Objectives (PEOs):

PEO 1: To equip students with the advanced concepts of Information Technology.

PEO 2: To help students in getting employment by mastering their skills.

PEO 3: To nurture creative thinking and make the students capable of undertaking innovative practices.

PEO 4: To develop environmental awareness, empowerment of humanity and civic consciousness.

PEO 5: To build the ability to cope with the changing environment

PEO 6: To mould them as responsible citizens by imparting value based education.

Program Outcomes (POs):

On successful completion of the M.Sc. Networking & Information Technology program, the graduates will be:

PO 1: Knowledge: Gain in-depth knowledge of software and hardware techniques

PO 2: Problem solving: Ability to critically analyze and provide software solutions for problems

PO 3: Environment and sustainability: Understand the impact of software solutions in environmental and societal context and strive for sustainable development.

PO 4: Team Work: Work in teams to accomplish the objective.

PO 5: Communication Skills: Able to communicate effectively.

Programme Specific Outcomes (PSOs):

PSO 1: Understand and analyze the advanced knowledge in the Information Technology domain.

PSO 2: Enhance the logical and analytical thinking to understand the computational systems.

PSO 3: Ability to comprehend the development methodologies of software systems and to design the software solutions.

PSO 4: Explore the developing areas in the Information Technology sector and to enrich themselves to be skillful to meet the diverse expectations of the industry.

PSO 5: Equipped to be competent in providing optimal and ethical solutions to the technological challenges laid by the professional societies.

	PO 1	PO 2	PO 3	PO 4	PO 5
PSO 1	S	S	L	S	S
PSO 2	S	S	S	S	S
PSO 3	M	S	M	S	M
PSO 4	S	S	S	S	S
PSO 5	L	S	S	S	S

S – Strong, M- Medium, L- Low

Duration of the Course:

M.Sc. Networking & Information Technology is a 2 years full time programme spread over four semesters.

Eligibility for Admission to the Programme

Candidates who have studied Bachelor's degree in relevant disciplines like B.Sc. in IT/CS, BCA, BE/BTech in IT or CS from recognized university are eligible for this programme (as specified in the admission guidelines given by the Directorate of Collegiate Education 2024-'2025 www.tndce.tn.gov.in)

**SEMESTER WISE COURSE LIST
FIRST YEAR : Semester – I**

Specification	Courses	Credits	No. of Hours
Core – I	Mathematical Foundation for Information Technology	4	5
Core – II	Python Programming	4	5
Core – III	Java with Networking	4	4
Core – IV [LAB]	Python Programming – Practical	3	4
Core – V [LAB]	Java with Networking– Practical	3	4
Elective – I	Edge Computing / Mobile Commerce / Distributed and Cloud Computing	3	4
Elective – II	Data Communication and Networking / Block Chain Technology / Internet of Things and its Applications	3	4
		24	30

Semester-II

Specification	Courses	Credits	No. of Hours
Core – VI	Relational Database Management System	4	5
Core – VII	Data Structures and Algorithms	4	5
Core – VIII [LAB]	RDBMS - Practical	3	4
Core – IX [LAB]	Data Structures and Algorithms - Practical	3	4
Elective – III	Compiler Design / Intelligent Systems / Robotics and its Applications	3	4
Elective – IV	Software Project Management / Software Testing / Object Oriented Analysis and Design	3	4
Skill Enhancement Course – I	Reactive Native	2	4
		22	30

Second Year : Semester – III

Specification	Courses	Credits	No. of Hours
Core – X	Robotic Process Automation	4	5
Core – XI	Research Methodology	4	4
Core – XII	Wireless Communication	4	4
Core – XIII [LAB]	Robotics - Practical	3	4
Core – XIV [PRJ]	Mini Project	6	6
Elective – V	Cryptography & Network Security / Big Data Analytics / Data Mining and Warehousing	3	4

Skill Enhancement Course – II	Artificial Neural Networks	2	3
	Internship	2	-
		28	30

Semester-IV

Specification	Courses	Credits	No. of Hours
Core – XV	Project with Viva Voce	16	30
	Extension Activity	1	-
		17	30

Total Credits : 91

Scheme of Evaluation (THEORY): Core/ Elective/ Skill Enhancement Courses

Total Marks:100 (Internal:25 Marks, External:75Marks)

<p>There is no Passing Minimum for the CIA component. But overall(CIA + External),the student should get 50% or more to get a pass</p>	
CIA-Internal Marks	External Marks

i. Average of best two tests from three: 15 Marks	End Semester Examination
ii. Assignment: 05 Marks	
iii. Seminar: 05 Marks	
Total: 25 Marks	Total: 75 Marks
Minimum Passing 50% i.e. 38marks	

Scheme of Evaluation (PRACTICAL): Core / Skill Enhancement Course

Total Marks:100 (Internal:50 Marks, External:50 Marks)

There is no Passing Minimum for the CIA component. But overall(CIA + External),the student should get 50% or more to get a pass	
CIA-Internal Marks	External Marks
i. Completion of Practical in time : 20 Marks	End Semester Practical Examination
ii. Model Practical Test : 20 Marks	
iii. Completion of Record work: 10 Marks	
Total: 50 Marks	Total: 50 Marks
Minimum Passing 50% i.e. 38 marks	

Scheme of Evaluation (PROJECT)

Total Marks:100 (Internal:50 Marks, External:50 Marks)

CIA-Internal Marks		External Marks	
i. Completion of Project in time : 10 Marks		End of IV Semester Project Submission and Viva-voce Examination	
ii. Review marks(3 reviews) : 30 Marks			
iii. Completion of Report work: 10 Marks			
Total: 50 Marks		Total: 50 Marks	
Minimum Passing 50% i.e. 38marks			

Project : Individual Project report should be submitted at the end of IV semester for external evaluation. Internal – 50 Marks, External – 50 Marks (Total 100 Marks). The internal marks should be given based on the presentation of three reviews(0th review -10 Marks, 1st review – 10 Marks, 2nd review – 10 Marks) and the performance assessment of the guide (Project completion in time 10 Marks and Report 10 Marks).

Internship/Industrial visit/Field visit/Research Knowledge Updation Activity:

- A report should be submitted at the end of III semester and evaluated by external examiners.
- Internal – 50 Marks, External – 50 Marks (Total : 100 Marks)
- Internship students should submit certificate of attendance from the industry along with report.

Extension Activity :

- Outreach Activities / Conducting Virtual Presentations
 - Outreach Activities
 - Creating awareness of the usage of Computers in remote places
 - Performing any computer exhibition in a village
 - Conducting any type of awareness programmes using computers/ software
 - Conducting Virtual Presentations
 - Encourage the school students through some presentations
 - Conducting higher education awareness among school students using computers
- External examination will be conducted at the end of IV semester.
- Internal – 50 Marks, External – 50 Marks (Total : 100 Marks)

External (End Semester) Examination Question Pattern

Time: 3 hours	Max. Marks: 75
<p>Part– A (15 x 1 = 15)</p> <p><i>Answer all the questions</i></p> <p>Ten Questions, three objective type questions from each unit.</p>	
<p>Part–B (5 x 4 = 20)</p> <p><i>Answer all the questions</i></p> <p>Five Questions, two short answer type questions from each unit with internal choice (Either ... Or ...type)</p>	
<p>Part–C (5 x 8 = 40)</p> <p><i>Answer all the questions</i></p> <p>Five Questions, two descriptive/Analytical type questions from each unit with internal choice (Either... Or ...type)</p>	

Title of the Course			MATHEMATICAL FOUNDATION FOR INFORMATION TECHNOLOGY							
Category		CORE			Paper Number			CORE I		
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks		
	5	0	0	I	I	4	5	CIA	External	Total
Objectives of the Course				<ol style="list-style-type: none"> 1. Propositional function, quantifiers, rules of inference. 2. Binary relations, posets, Hasse diagram, lattice, Functions, and pigeonhole principle. 3. Algebraic structures like groups and elementary combinatorics. 4. How to generate various types of functions recursively and solve them. 5. Various concepts in graphs like its representation, planar graphs, graph coloring and trees 						

Course Outline	UNIT I : MATRIX ALGEBRA Matrices - Rank of a matrix - Solving system of equations Eigenvalues and Eigenvectors - Cayley - Hamilton theorem - Inverse of a matrix.
	UNIT II : BASIC SET THEORY Basic definitions - Venn diagrams and set operations - Laws of set theory -. Relations - Properties of relations - Matrices of relations - Closure operations on relations - Functions - Injective, subjective and objective functions-Hermitian and Unitary operators/matrices.
	UNIT – III : COMBINATORICS Review of Permutation and Combination - Mathematical Induction - Pigeon hole principle - Principle of Inclusion and Exclusion
	UNIT IV : MATHEMATICAL LOGIC Propositions and logical operators - Truth table - Propositions generated by a set - Equivalence and implication - Basic laws - Some more connectives - Functionally complete set of connectives - Normal forms - Proofs in propositional calculus - Predicate calculus
	UNIT V : GRAPH THEORY: Graphs: An Introduction, Special Graphs, Subgraph, Degree of a Vertex – The Concept, Given a Degree Sequence – How to Draw the Graph? Adjacency Matrices, Incidence Matrices, Isomorphism of Graphs, Paths and Circuits, Euler Paths, Hamiltonian Circuit, the Travelling Salesman Problem, Shortest Path Problem
Extended Professional Component	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour) (is a part of internal component only, Not to be included in the External Examination question paper)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to
CLO1. Apply mathematical concept for Information Technology problem solving.
CLO2. Design mathematical models for real time projects and applications.
CLO3. Analyze each learning model from a different algorithmic approach
CLO4. Acquire knowledge of relations, functions and mathematical logic
CLO5. Understand the basic concepts of Graph Theory

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CO's	Course Outcomes
CLO1	Explain the basic concepts in python language.
CLO2	Apply the various data types and identify the usage of control statements, loops, functions and modules in python for processing the data
CLO3	Analyze and solve problems using basic constructs and techniques of python.
CLO4	Assess the approaches used in the development of interactive application.
CLO5	To build real time programs using python

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CO's	Course Outcomes
CLO1	Explain the basic concepts in cloud computing.
CLO2	To provide the knowledge on edge computing applications
CLO3	To get the understanding on edge data centre
CLO4	To understand the details on edge pipeline
CLO5	To get the knowledge about edge sensor data in machine learning

Title of the Course		MOBILE COMMERCE								
Category		Elective			Paper Number			ELECTIVE I B		
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks		
								CIA	External	Total
	4	0	0	I	I	3	4	25	75	100
Pre-requisite		The Prerequisites of Cloud computing is it builds upon prior knowledge that students have on computing and software systems and programming knowledge.								
Objectives of the Course		The main objectives of this course are to: <ul style="list-style-type: none"> ➤ study the fundamentals of e-commerce ➤ understand the basics of mobile commerce ➤ understand the mobile commerce technology ➤ understand the applications of mobile commerce ➤ acquire the idea about business to business mobile e-commerce 								

Course Outline	UNIT-1 ELECTRONIC COMMERCE Introduction - The e-commerce environment - The e-commerce marketplace - Focus on portals - Location of trading in the marketplace - Commercial arrangement for transactions - Focus on auctions - Business models for e-commerce - Revenue models - Focus on internet start, up companies the dot, com, E-commerce versus E-business.
	UNIT-2 MOBILE COMMERCE Infrastructure of M-Commerce - Types of Mobile Commerce Services - Technologies Of Wireless Business - Benefits and Limitations, Support - Mobile Marketing & Advertisement - Non-Internet Applications In M-Commerce - Wireless/Wired Commerce Comparisons
	UNIT-3 MOBILE COMMERCE, TECHNOLOGY A Framework for the Study of Mobile Commerce, NTT DoCoMo's I, Mode, Wireless Devices for Mobile Commerce - Towards a Classification Framework for Mobile Location Based Services - Wireless Personal and Local Area Networks - The Impact of Technology Advances on Strategy Formulation in Mobile Communications Networks
	UNIT-4 MOBILE COMMERCE, APPLICATIONS Theory And Applications: The Ecology of Mobile Commerce - The Wireless Application Protocol, Mobile Business Services, Mobile Portal - Factors Influencing the Adoption of Mobile Gaming Services - Mobile Data Technologies And Small Business Adoption And Diffusion. M-Commerce in The Automotive Industry, Location, Based Services: Criteria For Adoption And Solution Deployment - The Role Of Mobile Advertising In Building A Brand - M-Commerce Business Models
	UNIT-5 BUSINESS-TO-BUSINESS MOBILE E-COMMERCE Enterprise Enablement, Email and Messaging - Field Force Automation (Insurance, Real Estate, Maintenance, Healthcare) - Field Sales Support (Content Access, Inventory) - Asset Tracking And Maintenance/Management - Remote IT Support - Customer Retention (B2C Services, Financial, Special Deals) - Warehouse Automation - Security
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Get the knowledge of Mobile commerce usage and its applications

Title of the Course		Distributed and Cloud Computing									
Category		Elective			Paper Number			ELECTIVE I C			
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks			
								CIA	External	Total	
	4	0	0	I	I	3	4	25	75	100	
Pre-requisite		The Prerequisites of Cloud computing is it builds upon prior knowledge that students have on computing and software systems and programming knowledge.									

Objectives of the Course	<p>The main objectives of this course are to:</p> <ul style="list-style-type: none"> ➤ Classify and describe the architecture and taxonomy of Parallel and Distributed Systems Context.(K1) ➤ Cloud Virtualization, Abstractions and Enabling Technologies Characterize the distinctions between Infrastructure, Platform and Software as a Service (IaaS, PaaS, SaaS).(K2) ➤ Examine the design of task and data parallel distributed algorithms on Programming Patterns for "Big Data" Applications on Cloud.(K3,K4) ➤ Application Execution Models on Clouds.(K5) ➤ Illustrate the use of load balancing techniques for stateful and stateless applications.(K6)
Course Outline	<p>UNIT-I : Distributed Communication Introduction to Distributed Systems – Characterization of Distributed Systems – Distributed Architectural Models –Remote Invocation – Request-Reply Protocols – Remote Procedure Call –Remote Method Invocation – Group Communication – Coordination in Group Communication– Ordered Multicast – Time Ordering – Physical Clock Synchronization – Logical Time and Logical Clocks.</p>
	<p>UNIT-II : Distributed Resource Management Global States– Distributed Mutual Exclusion – Election Algorithms – Distributed Deadlock – Distributed File System Architecture – HDFS – Map Reduce.</p>
	<p>UNIT-III : Introduction to Cloud Cloud Computing Overview – Origins of Cloud computing – Cloud components - Essential characteristics – On-demand self-service , Broad network access , Location independent resource pooling , Rapid elasticity , Measured service. Architectural influences – High- performance Computing, Utility and Enterprise Grid Computing, Autonomic Computing, Service Consolidation, Horizontal scaling, Web services, High scalability Architecture. Cloud Benefits – Cloud Deployment Model: Public Clouds – Private Clouds – Community Clouds - Hybrid Clouds - Advantages of Cloud Computing.</p>
	<p>UNIT-IV : Virtualization Techniques Introduction to Virtual Machines, Emulation :Interpretation and Binary Translation, Process Virtual machines and System Virtual machines Virtualization : Virtualization and cloud computing - Need of virtualization – limitations – Types of Hardware Virtualization: Full Virtualization – Para Virtualization – Case Studies : Xen,VMware – Desktop Virtualization – Network Virtualization.</p>

	<p align="center">UNIT-V:</p> <p>Cloud Resources Management And Issues</p> <p>Cloud architecture: Cloud delivery model, Cloud Storage Architectures, Software as a Service (SaaS): SaaS service providers – Google App Engine, Salesforce.com and googleplatform – Benefits – Operational benefits - Economic benefits – Evaluating SaaS – Platform as a Service (PaaS): PaaS service providers – Right Scale – Salesforce.com – Rackspace – Force.com – Services and Benefits – Infrastructure-as-a -Service (IaaS): IaaS Service Providers – Amazon EC2 – GoGrid.</p>

Title of the Course		BLOCK CHAIN TECHNOLOGY									
Category		Elective			Paper Number			ELECTIVE II B			
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks			
								CIA	External	Total	
	4	0	0	I	I	3	4	25	75	100	
Pre-requisite		Basic Knowledge of Networking									
Objectives of the Course		<ul style="list-style-type: none"> To understand the concepts of block chain technology To understand the consensus and hyper ledger fabric in block chain technology. 									
Course Outline											
		UNIT - I History: Digital Money to Distributed Ledgers -Design Primitives: Protocols, Security, Consensus, Permissions, Privacy- : Block chain Architecture and Design-Basic crypto primitives: Hash, Signature- Hash chain to Block chain-Basic consensus mechanisms.									
		UNIT - II Requirements for the consensus protocols-Proof of Work (PoW)- Scalability aspects of Block chain consensus protocols: Permissioned Block chains-Design goals-Consensus protocols for Permissioned Block chains.									
		UNIT - III Decomposing the consensus process-Hyper ledger fabric components-Chain code Design and Implementation: Hyper ledger Fabric II:-Beyond Chain code: fabric SDK and Front End-Hyper ledger composer tool.									
		UNIT - IV Block chain in Financial Software and Systems (FSS): -Settlements, -KYC, -Capital markets-Insurance- Block chain in trade/supply chain: Provenance of goods, visibility, trade/supply chain finance, invoice management/discounting.									
		UNIT - V Block chain for Government: Digital identity, land records and other kinds of record keeping between government entities, public distribution system / social welfare systems: Block chain Cryptography: Privacy and Security on Block chain.									
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)		Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)									
Skills acquired from this course		Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional knowledge about Block chain

Title of the Course		RELATIONAL DATABASE MANAGEMENT SYSTEM								
Category		CORE			Paper Number			CORE VI		
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks		
								CIA	External	Total
	5	0	0	I	II	4	5	25	75	100
Pre-requisite		Fundamental computer knowledge that includes the hardware and memory storage.								
Objectives of the Course		To understand the basic DBMS models, architecture, query and to normalize the database. To Learn Transaction Processing, Recovery and Distributed Database.								
Course Outline		UNIT-I : Introduction: Database System Applications-Purpose of Database Systems-View of Data- Database Users and Administrators. Relational Database: Structure of Relational Databases- Databases Schema- Keys-Schema Diagrams- Formal Relational Query Languages: Relational Algebra-Tuple Relational Calculus								

	<p>UNIT-II : Database Design: Overview of Design Process-The Entity Relationship Model-Constraints- Removing Redundant Attributes in Entity Sets-Entity-Relationship Diagrams-Reduction to Relational Schemas-Extended E-R features -Alternative Notations for Modeling Data. Relational Database Design: Features of Good Relational Design-Functional Dependency-Normalization: 1NF, 2NF, 3NF, BCNF, 4NF, 5NF- Functional Dependency Theory</p> <p>UNIT-III : Transaction Management: Transaction Concept-Simple Transaction Model-Storage Structure- Transaction Atomicity and Durability-Transaction Isolation-Serializability. Concurrency Control: Lock Based Protocols-Locks-Granting of Locks-Two Phase Locking Protocol-Time Stamp Based Protocol - Recovery System: Failure Classification-Recovery and Atomicity: LogRecords-Database Modification-Concurrency Control and Recovery-Recovery Algorithm</p> <p>UNIT-IV : Distributed Database: Homogeneous and Heterogeneous Databases-Distributed Data storage- Distributed Transactions-Commit Protocols-Concurrency Control in Distributed Databases- Distributed Query Processing. Case study: MongoDB</p> <p>UNIT-V: SQL - Table Fundamentals - Viewing Data - Inserting - Deleting - Updating - Modifying - Constraints - Functions - Grouping - Subqueries - Joins - Views.PL/SQL: Introduction - PL/SQL Block - Data Types And Variables - Control Structure -Cursors - PL/SQL Security - Locks. PL/SQL Database Objects: Exception Handling-Packages - Procedures and Functions - Database Triggers</p>
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO1: Explain how the choice of data structures and algorithm design methods impacts the performance of programs.

CLO 2: Describe the concept of Range Counting and Semi group model. K-d trees, Orthogonal Range trees, Leftist heap.

CLO 3: Design and implement an appropriate hashing function for an application.

CLO 4: Compare alternative implementations of data structures with respect to performance.

CLO 5: Contrast the benefits of dynamic and static data structures implementations.

Title of the Course				DATA STRUCTURES AND ALGORITHMS - PRACTICAL						
Category		CORE		Paper Number			CORE IX			
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks		
								CIA	External	Total
	0	0	4	I	II	3	4	50	50	100
Pre-requisite				The Prerequisites For Data Structures And Algorithms is, one must be aware of at least one programming language.						

Objectives of the Course	The main objectives of this course are to: <ul style="list-style-type: none"> ➤ Describe the concept of Activity selection of Huffman coding Implementations ➤ Design and implement of Spanning tree Implementations ➤ Explain the Implementation of Binary Search Tree ➤ Identify the Red Black tree Implementation
Course Outline	<ol style="list-style-type: none"> 1. Implementation of Merge sort algorithm 2. Implementation of quick sort Algorithms 3. Implementation of Binary Search Tree 4. Red Black Tree Implementation 5. Implementation of Fibonacci Heap Implementation 6. Implementation of Graph Traversals 7. Implementation of Spanning Tree 8. Shortest path Algorithms(Dijkstra's, Bellman Ford Algorithms) 9. Implementation of Matrix Chain Multiplication 10. Activity selection and Huffman coding Implementation
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill
Recommended Text	Thomas H.Cormen, Charles E.Leiserson, Ronald L.Rivest, Clifford Stein, “Introduction to Algorithms: Third Edition”, The MIT Press, 2014.
Reference Books	Peter Brass, “Advanced Data Structures”, Cambridge University Press, 2014

By the end of the course the students will be able to

CLO 1: Define how the design of data structures and algorithm design methods impacts the performance of programs.

CLO 2: Implement the applications using Fibonacci Heap and shortest path Algorithms

CLO 3: Identify various algorithmic for Implementation of Matrix Chain Multiplication algorithms

CLO 4 : Demonstrate the creation of Graph Traversals methods and the concepts of Binary Search tree

CLO 5: Construct Data structure programs using Merge sort and Quick sort.
Develop programs for implementing trees and their traversal operations.

Title of the Course		INTELLIGENT SYSTEMS										
Category		Elective			Paper Number			ELECTIVE III B				
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks				
								CIA	External	Total		

	4	0	0	I	II	3	4	25	75	100
Pre-requisite	Basic knowledge of data mining concepts									
Objectives of the Course	To acquire knowledge on various intelligent system techniques and methodologies and to have enriched knowledge on Knowledge representation, problem solving, and learning methods in solving particular engineering problems.									
Course Outline										
	<p>UNIT-I :</p> <p>Artificial Intelligence: AI problems-AI technique-Problem Search:-Production Systems – Problem Characteristics – Production system characteristics- Heuristic Search techniques: Generate and Test – Hill Climbing – Constraint Satisfaction, Means-end analysis</p>									
	<p>UNIT-II :</p> <p>Knowledge representation issues: Representations and mappings – Approaches to Knowledge representations –Frame problem –. Using Predicate Logic: Representing simple facts in logic - Representing Instance and ISA relationships – Computable functions and predicates – Resolution</p>									
	<p>UNIT-III :</p> <p>Representing knowledge using rules: Procedural Vs Declarative knowledge – Logic programming – Forward Vs Backward reasoning – Matching – Control knowledge. Knowledge representation summary: Syntactic and Semantic spectrum of representation-Logic and slot – and-filler structures-Other representational techniques</p>									
	<p>UNIT-IV :</p> <p>Rule-based expert systems: Introduction- Rules as a knowledge representation technique- players- Structure- Forward chaining and backward chaining inference techniques- Fuzzy expert systems: Introduction- Fuzzy sets- Linguistic variables and hedges- Operations - Fuzzy rules- - Building a fuzzy expert system</p>									
	<p>UNIT-V:</p> <p>Artificial neural networks: Neuron- perceptron- Multilayer neural networks- - The Hopfield network- Robotics: Introduction-Robot hardware-Perception-Moving-Robotic software architecture.</p>									

<p>Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)</p>	<p>Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)</p>

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CO's	Course Outcomes
CLO1	Recognize the concepts and principles of object-oriented analysis, design and Testing
CLO2	Demonstrate the importance of system development process using various approaches and choose the relevant technique for a system in each phases of SDLC
CLO3	Differentiate various object-oriented analysis, design and testing methods and models.

CLO4	Assess various analysis, design and testing strategies appropriate to build high-performance object-oriented system
CLO5	Design Object oriented systems using object modeling techniques and analyze them for correctness and quality

Category		SKILL			Paper Number			SKILL I		
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks		
								CIA	External	Total
	4	0	0	I	II	2	4	25	75	100
Pre-requisite		Able to know the fundamentals of Programming								
Objectives of the Course		<p>The main objectives of this course are to:</p> <ul style="list-style-type: none"> To write good programming in React Native To develop cross-platform API To develop various applications using React Native 								
Course Outline		<p>UNIT I:</p> <p>Getting started with React Native - Introducing React and React Native - Understanding how React Native works - React Native's strengths - React Native's drawbacks - Creating and using basic components - Understanding React: Managing component data using state - Managing component data using props</p>								
		<p>UNIT II:</p> <p>React component specifications - React lifecycle methods - Building first React Native app - Laying out the todo app - Coding the todo app - Opening the developer menu -Continuing building the todo app</p>								

	<p>UNIT III:</p> <p>Developing applications in React Native: Introduction to styling - Applying and organizing styles in React Native - Styling view components - Styling Text components - Styling in depth - Platform-specific sizes and styles - Using transformations to move, rotate, scale, and skew components - Using flexbox to lay out components</p>
	<p>UNIT IV:</p> <p>Implementing cross-platform APIs - Using the Alert API to create cross-platform notifications - Using the AppState API to detect the current application state - Using the AsyncStorage API to persist data - Using the Clipboard API to copy text into the user's clipboard</p>
	<p>UNIT V:</p> <p>Using the Dimensions API to get the user's screen information - Using the Geolocation API to get the user's current location information - Using the Keyboard API to control the location and functionality of the native keyboard - Using NetInfo to get the user's current online/offline status - Getting information about touch and gesture events with Pan Responder</p>
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Acquire the knowledge about React Native
Recommended Text	Nader Dabit, "React Native in Action", Manning Publications Co., 2019.

Title of the Course		ROBOTIC PROCESS AUTOMATION									
Category		CORE			Paper Number			CORE X			
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks			
								CIA	External	Total	
	5	0	0	II	III	4	5	25	75	100	
Pre-requisite		Basic computer operations									
Objectives of the Course		To automate the robotic process which will be helpful to the future technology									
Course Outline		<p>UNIT I: INTRODUCTION TO ROBOTIC PROCESS AUTOMATION</p> <p>Scope and automation techniques, Robotic process automation - What can RPA do? Benefits of RPA, Components of RPA, RPA platforms, The future of automation. RPA BASICS: History of Automation - What is RPA - RPA vs Automation - Processes & Flowcharts - Programming Constructs in RPA – What Processes can be Automated - Types of Bots - Workloads which can be automated - RPA Advanced Concepts - Standardization of processes - RPA Development methodologies - Difference from SDLC - Robotic control flow architecture</p>									

UNIT II: RPA TOOL INTRODUCTION AND BASICS

Introduction to RPA Tool - The User Interface - Variables - Managing Variables - Naming Best Practices – The Variables Panel - Generic Value Variables - Text Variables - True or False Variables - Number Variables – Array Variables - Date and Time Variables - Data Table Variables – Managing Arguments - Naming Best Practices – The Arguments Panel - Using Arguments - About Imported Namespaces - Importing New Namespaces- Control Flow -Control Flow Introduction - If Else Statements - Loops - Advanced Control Flow - Sequences - Flowcharts – About Control Flow – Control Flow Activities - The Assign Activity - The Delay Activity - The Do While Activity - The If Activity – The Switch Activity - The While Activity - The For Each Activity - The Break Activity - Data Manipulation-Data Manipulation Introduction - Scalar variables, collections and Tables - Text Manipulation – Data Manipulation

UNIT III: ADVANCED AUTOMATION CONCEPTS & TECHNIQUES

Recording Introduction - Basic and Desktop Recording - Web Recording – Input / Output Methods - Screen Scraping - Data Scraping - Scraping Advanced Techniques - Selectors - Defining and Assessing Selectors - Customization -Debugging - Dynamic Selectors - Partial Selectors - RPA Challenge - Image, 36 Text & Advanced Citrix Automation Tables & PDF - Data Tables in RPA - Excel and Data Table basics - Data Manipulation in excel

UNIT IV: HANDLING USER EVENTS & ASSISTANT BOTS, EXCEPTION HANDLING

What are assistant bots? - Monitoring system event triggers - Hotkey trigger - Mouse trigger - System trigger -Monitoring image and element triggers - An example of monitoring email - Example of monitoring a copying event and blocking it - Launching an assistant bot on a keyboard event

UNIT V: DEPLOYING AND MAINTAINING THE BOT

Publishing using publish utility - Creation of Server - Using Server to control the bots - Creating a provision Robot from the Server - Connecting a Robot to Server - Deploy the Robot to Server - Publishing and managing updates -Managing packages - Uploading packages - Deleting packages

Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, robotic process, RPA tools and advanced concepts

Title of the Course			RESEARCH METHODOLOGY								
Category		CORE			Paper Number			CORE XI			
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks			
								CIA	External	Total	
	4	0	0	II	III	4	4	25	75	100	
Pre-requisite			Basic critical and writing skills								
Objectives of the Course			To impart knowledge and skills required for research problem formulation, analysis, solutions, technical paper writing and drafting and filing patents.								
Course Outline			<p>UNIT-I :</p> <p>Research Methodology: Objectives and motivation of research - Types of research - Research approaches - Significance of research - Research methods verses methodology - Research and scientific method - Importance of research methodology - Research process - Approaches of investigation of solutions for research problem, data collection, analysis, interpretation, necessary instrumentations- Criteria of good research. Defining the research problem: Definition of research problem - Problem formulation - Necessity of defining the problem - Technique involved in defining a problem.</p>								

	<p>UNIT-II :</p> <p>Literature Survey and Data Collection: Importance of literature survey - Sources of information - Assessment of quality of journals and articles - Information through internet. Effective literature studies approaches, analysis, plagiarism, and research ethics. Data - Preparing, Exploring, examining and displaying.</p>
	<p>UNIT-III :</p> <p>Research Analysis and Design: Meaning of research design - Need of research design - Different research designs - Basic principles of experimental design - Developing a research plan - Design of experimental set-up - Use of standards and codes. Overview of Multivariate analysis, Hypotheses testing and Measures of Association. Presenting Insights and findings using written reports and oral presentation.</p>
	<p>UNIT-IV :</p> <p>Intellectual Property Rights: Nature of Intellectual Property: Patents, Designs, Trade and Copyright- Process of Patenting and Development: technological research, innovation, patenting, development- Role of WIPO and WTO in IPR establishments, Right of Property, Common rules of IPR practices, Types and Features of IPR Agreement, Trademark, Functions of UNESCO in IPR maintenance.</p>
	<p>UNIT-V:</p> <p>Patent Rights: Scope of Patent Rights- Licensing and transfer of technology- Patent information and databases- Geographical Indications - New Developments in IPR: Administration of Patent System, IPR of Biological Systems, Computer Software etc. Traditional knowledge Case Studies, IPR and IITs -Licenses, Licensing of related patents, patent agents, Registration of patent agents.</p>

Title of the Course				BIG DATA ANALYTICS						
Category			Elective		Paper Number			ELECTIVE V B		
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks		
								CIA	External	Total
	4	0	0	II	III	3	4	25	75	100
Pre-requisite				This course provides an in-depth understanding of terminologies and the core concepts behind big data problems, applications, systems and the techniques, that underlie today's big data computing technologies.						
Objectives of the Course				By the end of the course the students will be able to <ul style="list-style-type: none"> ➤ Identify and distinguish big data analytics applications. ➤ Describe big data analytics tools. ➤ Present cases involving big data analytics in solving practical problems. 						

<p>Course Outline</p>	<p>UNIT-I : Overview of Big Data and Data Analytics Overview of Big Data: Characteristics of Big Data-Big Data Sources-Challenges in Big Data processing-Scalability issues; Business Intelligence v/s Data Analytics-Need of Data Analytics- Data Analytics in Industries- Role of the Data Scientist. The Design of HDFS- HDFS Concepts- Blocks – Name nodes and Data nodes; The Command- Line Interface: Basic File system Operations; Hadoop File systems: Interfaces-The Java Interface-Data Flow; Hadoop I/O: Data Integrity-Compression-Serialization-File-based data structures.</p> <p>UNIT-II : MapReduce and its application Analyzing the Data with Unix Tools- Analyzing the Data with Hadoop- Map and Reduce- Java Map Reduce; Data Flow- Combiner Functions- Running a Distributed Map Reduce Job; Hadoop Streaming; Hadoop Pipes.</p> <p>UNIT-III : Application development using MapReduce framework The Configuration API- Configuring the Development Environment- Writing a Unit Test- Running Locally on Test Data- Running on a Cluster-Tuning a Job- MapReduce Workflows.</p> <p>UNIT – IV : Working of MapReduce Mining Data Streams: The Stream Data Model- Sampling data in a stream-Filtering Streams- The Bloom filter; Counting distinct elements in a stream-The Flajolet-Martin Algorithm. How stream works-Streams Processing Language; Apache Spark - Introduction- Features of Apache Spark- Components of Spark- Resilient Distributed Datasets- Data Sharing using Spark RDD-Spark Streaming.</p> <p>UNIT-V: Analytics for Big Data in motion Mining Data Streams: The Stream Data Model- Sampling data in a stream-Filtering Streams- Mining Social Network Graphs: Clustering of Social Network Graphs- Direct Discovery of Communities- Partitioning of Graphs-Finding overlapping communities- Simrank; Sentimentanalysis- Document sentiment classification- Rules of Sentiment Composition- Sentiment analysis using Twitter data.</p>
<p>Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)</p>	<p>Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)</p>
<p>Skills acquired from this course</p>	<p>Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill</p>

- CLO1:** To understand the basic knowledge of big data analytics.
CLO 2: To learn the techniques and tools for big data analytics.
CLO 3: To conduct application case studies to show the usage of big data analytics.
CLO 4: Design and develop program to big data analytics techniques.
CLO 5: Conduct big data analytics using system tools.

CO/PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO1	3	3	2	2	3	3

CO3	3	2	3	2	2	1
CO4	3	3	3	3	3	3
CO5	3	2	3	3	3	3
Weightage of course contributed To each PSO	15	12	14	12	14	13

Title of the Course		DATA MINING AND WAREHOUSING								
Category		Elective			Paper Number			ELECTIVE V C		
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks		
								CIA	External	Total
	4	0	0	II	III	3	4	25	75	100
Pre-requisite		Able to know extract useful data from a sea of un-amassed data and the understanding of data analysis.								
Objectives of the Course		<p>The main objectives of this course are to:</p> <p>Understand the basic data mining techniques and algorithms(K1)</p> <ul style="list-style-type: none"> ➤ Understand the Association rules, Clustering techniques and Data warehousing contents(K1,K2) ➤ Illustrate the mining techniques like association, classification and clustering on transactional databases(K3) ➤ Illustrate the warehousing techniques like Online Analytical Processing(OLAP) and Multidimensional Data Analysis(K4) ➤ Compare and evaluate different data mining techniques like classification, prediction, Clustering and association rule mining(K5) ➤ Design data warehouse with dimensional modeling and apply OLAP operations(K6) 								
Course Outline		<p>UNIT-I :</p> <p>Data Warehousing Data Warehousing and Business Analysis: - Data warehousing Components –Building a Data warehouse – Mapping the Data Warehouse to a Multiprocessor Architecture – DBMS Schemas for Decision Support – Data Extraction, Cleanup, and Transformation Tools –Metadata – reporting – Query tools and Applications – Online Analytical Processing (OLAP) – OLAP and Multidimensional Data Analysis.</p>								
		<p>UNIT-II :</p> <p>Data Mining & Association Rule Mining Data Mining: - Data Mining Functionalities – Data Preprocessing – Data Cleaning – Data Integration and Transformation – Data Reduction – Data Discretization and Concept Hierarchy Generation. Association Rule Mining: - Efficient and Scalable Frequent Item set Mining Methods – Mining Various Kinds of Association Rules – from Association Mining to Correlation Analysis – Constraint-Based Association Mining.</p>								
		<p>UNIT-III :</p> <p>Classification & Prediction Classification and Prediction: - Issues Regarding Classification and Prediction – Classification by Decision Tree Introduction – Bayesian Classification – Rule Based Classification – Classification by Back propagation – Support Vector Machines – Associative Classification – Other Classification Methods – Prediction – Accuracy and Error Measures – Evaluating the Accuracy of a Classifier or Predictor</p>								

	UNIT-IV : Cluster Analysis Types of Data in Cluster Analysis – A Categorization of Major Clustering Methods – Partitioning Methods – Hierarchical methods – Density-Based Methods – Grid-Based Methods – Model Based Clustering Methods – Clustering High- Dimensional Data – Constraint-Based Cluster Analysis – Outlier Analysis.
	UNIT-V: Applied Data Mining Multidimensional Analysis and Descriptive Mining of Complex Data Objects – Spatial Data Mining – Multimedia Data Mining – Text Mining – Mining the World Wide Web.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill
Recommended Text	K.P. Soman, Shyam Diwakar and V. Ajay “Insight into Data mining Theory and Practice”, Easter Economy Edition, Prentice Hall of India, 2006.
Reference Texts	1. G. K. Gupta “Introduction to Data Mining with Case Studies”, Easter Economy Edition, Prentice Hall of India, 2006 2. Pang-Ning Tan, Michael Steinbach and Vipin Kumar “Introduction to Data Mining”, Pearson Education, 2007.

CLO1:To introduce the concept of data Mining and warehousing as an important tool for enterprise data management and cutting edge technology for building competitive advantage

CLO 2:Enable the students to learn the concepts of Mining tasks, classification, clustering and Data Warehousing.

CLO 3:To make students well versed in all data warehousing algorithms, methods of evaluation.

CLO 4: Develop skills of using recent data mining software for solving practical problems

CLO 5:Develop and apply critical thinking, problem-solving, and decision- making skills.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO 5	PSO 6
CO1	3	3	2	2	3	3
CO2	3	2	3	2	3	3

Title of the Course		ARTIFICIAL NEURAL NETWORKS								
Category		SKILL		Paper Number			SKILL II			
Course Code	L	T	P	Year	Semester	Credits	Inst. Hours	Marks		
								CIA	External	Total
	4	0	0	II	III	2	4	25	75	100
Pre-requisite		Able to know the fundamentals of computer networks								
Objectives of the Course		<p>The main objectives of this course are to:</p> <ul style="list-style-type: none"> • To understand the basics of artificial neural networks • To understand the Activation and Synaptic Dynamics. • To understand the Functional Units Of Ann For Pattern Recognition Tasks • To understand the Feedback Neural Networks • To understand the Applications Of Neural Systems 								
Course Outline		<p>UNIT – I Basics of Artificial Neural Networks: Characteristics of Neural Networks – Historical development of Neural Network principles – Artificial Neural Networks: Terminology – Models of Neuron – Topology – Basic Learning Laws</p>								
		<p>UNIT – II Activation and Synaptic Dynamics: Introduction – Activation Dynamic Models – Synaptic Dynamic Model – Learning Models – Learning Methods.</p>								
		<p>UNIT – III Functional Units Of Ann For Pattern Recognition Tasks: Pattern Recognition Problem – Basic Functional Units – Pattern Recognition Tasks by The Functional Units – FEED FORWARD NEURAL NETWORKS: Introduction – Analysis of Pattern Association Networks – Analysis of Pattern Classification Networks – Analysis of Pattern Mapping Networks.</p>								
		<p>UNIT – IV Feedback Neural Networks: Introduction – Analysis of Linear Auto Associative FF Networks – Analysis of Pattern Storage Networks. Competitive Learning Neural Networks: Introduction – Components of a Competitive Learning Network – Analysis of Feed Back Layer for Different Output Functions – Analysis of Pattern Clustering Networks – Analysis of Feed Mapping Network</p>								

	UNIT – V
	Applications Of Neural Systems: Applications of Neural Algorithms And Systems Character Recognition – Expert System Applications – Neural Network Control Applications, Spatio – Temporal Pattern Recognition – Neocognitron and other Applications
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Acquire the knowledge about Artificial Neural Network
Recommended Text	<ol style="list-style-type: none"> For Units I to IV : “ARTIFICIAL NEURAL NETWORKS”, B.YEGNANARAYANAN, Eastern Economy edition – Chapter 1,2, (2.1, 2.2, 2.3, 2.4 only), 3, 4, 5 (5.1, 5.2, 5.3 only) & 6. For Unit – V : “INTRODUCTION TO ARTIFICIAL NEURAL SYSTEMS”, JACEK M.ZURADA – Jaico Publishing House (1994).
Reference Texts	“Introduction to the theory of Neural Computation”- J.Hertz, A.Krogh and R.G.Palmer, Addison – Wesley 1991.

Course Outcomes	
After successful completion of the course, the student will be able to	
CO1	understand the principles of Neural Networks L2
CO2	Identify different types of models of artificial neural networks L3.
CO3	Analyse the feed-forward neural networks. L4
CO4	Analyse the feedback neural networks. L4
CO5	Compare different applications of artificial neural networks. L4
